About SolidStack

SolidStack is a Dubai software company and official AWS Partner. We design, build and run custom software, AI features, AWS cloud systems, websites and e-commerce for businesses in the UAE, Iraq and the UK.

Official AWS Partner

Certified cloud expertise, from migration to day-to-day operations.

Build and run

One team takes your product through every stage, so nothing gets lost between agencies.

Our own products

We make InfraMind and StageStore, so we know what it takes to ship.

In this catalog

01 Business Website
02 E-commerce Store
03 E-commerce Store + Mobile App
04 ERPNext Installation
05 AWS Migration (MAP) Assessment
06 AWS Consultation
07 StageStore
08 3D Printing
09 Custom AI Solutions

01
Business Website

Request a quote

A professional, fast, mobile-friendly website for your business, with domain, business email and hosting set up for you. First year of hosting is free.

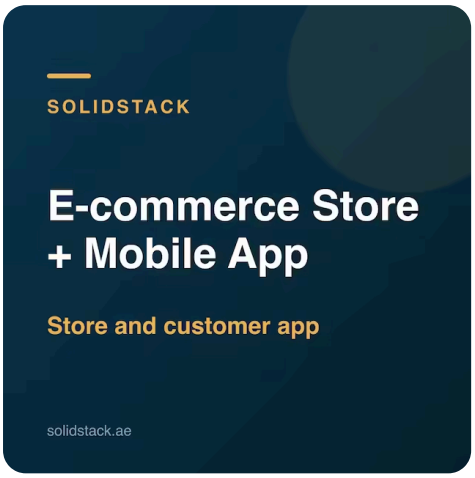
- Custom responsive design
- Domain & business email setup
- First-year hosting & SSL free
- SEO basics & analytics

02
E-commerce Store

Request a quote

An online store ready to sell: product catalog, cart, checkout and order management. Mobile app not included.

- Product catalog & order management
- Online checkout & payments
- Admin dashboard for products and orders



03
E-commerce Store + Mobile App

Request a quote

Everything in the E-commerce Store, plus a mobile app for your customers.

- Product catalog & order management
- Online checkout & payments
- Admin dashboard for products and orders
- Mobile app for your customers

04
ERPNext Installation

Request a quote

We install and set up ERPNext for your business, the open-source ERP for accounting, inventory, HR and CRM. Hosting is not included.

- ERPNext installation
- Initial setup for your business
- Hosting quoted separately

05
AWS Migration (MAP) Assessment

Request a quote

Plan your move to AWS and take advantage of AWS Migration Acceleration Program (MAP) funding opportunities. We assess your workloads, estimate AWS costs and build your migration roadmap. Final scope is agreed after an initial assessment.

- Workload & infrastructure assessment
- AWS cost estimate
- Migration roadmap
- MAP eligibility guidance

06
AWS Consultation

Request a quote

A 4-hour expert consultation on your AWS environment, followed by a written report with architecture diagrams and one compliance report.

- 4-hour consultation session
- Written findings report
- Architecture diagrams
- 1 compliance report
